

- LEGEND**
- Bedrock—poor quality.
 - Overburden—poor quality.
 - Extremely variable.
 - Generally favourable.

Note: The map presents a preliminary and general assessment of the qualitative and quantitative conditions of ground water in bedrock and overburden deposits of Southern Ontario. Physiographic maps, bedrock geology maps and ground water information on file in 1962 were utilized and interpretation was made on the basis of experience of the staff of the Division of Water Resources.
